Stutters whole PC every 2 seconds, unplayable!. Did it for the cards. To those of you contemplating buying this game, I say this and only this.

"Without love, it cannot be seen."

If you were ever captivated by two questions as a gamer and those questions were:

1. What can change the nature of a man?
2. What is the solution to Schrodinger's cat?

Then i think you will enjoy this game immensely.. Super addicting and fun. The dark ambience and atmosphere really contribute to the game. Soundtrack is simple but effective in contributing to the atmosphere. Pricetag makes it a no brainer!. how can i apply this App...? I can't find this apps option in ambition mode option.

you dont even have to complete the game to 100%..only idle for 15 mins.
Although the games is minimalistic and nice, it's pure achievement spam.

edit: cancer game with achievement spam for idling. avoid. Charming yet utterly hilarious. A real pleasure to play.. Don't waste money on this game. Buy something else.. i tried to tab out of the game and rather than just minimizing there is a giant black/white box covering about 70% of my screen. i wouldn't care as much if this game wasn't as boring as it was. it's cute, its something but it's just ridiculously simple. i have spent maybe five minutes max at a time trying to play this game. as bright and neat as it is, the storyline is bland and dull and the game itself isn't exciting there just isn't a point to play. at first i recommended this game to someone, and now i regret it. on the off chance that they might actually buy the game and be as disappointed in it as i am, i don't want them to think that my taste in games is subpar. upsetting honestly, because i expected so much i generally love puzzles and colorful ones are the best way to go but. this is just simple and childish. its upsetting.. Wow Im the first person to review this game. Ive played many tower defence games and this one isnt a bad game. Its a challenging game with several different biomes to play in. But must say the varitey of enemys is lacking. Their is only one music track which btw isnt bad. The price is deffently worth it. I give Raging Titans a 3.5 out of 5 stars. Ps Graphis are pretty decent for a unity game . Two Tumbs up!!..And almost forgot their is a leader board that keeps track of ur scoring with other online players. Very Kool!!!. zezeriskyrim: best engine
zezeriskyrim: great taste
zezeriskyrim: 8V8

Review as of 3.8.1

Pros

1. Optimized
2. The Code they ship with the engine is sufficient enough to make a perfectly working game.
3. New voxel based features including fog and an Experimental Global Illumination
4. The Devs are more open about their work on the forums now
5. The Documentations are updated daily , with some tutorials being written slowly by the devs.
6. VR Support

Cons

1. Still no Roadmap for things to come
2. No support for any kind of Video texture , need to get scaleform from autodesk for it...

Other than that I have not hit any roadblocks using the engine since the release of EaaS.

I r8 it 8V8 m8.. Error 404 : Challenge not found. Blackfaun is too early for access. It looks like it will eventually be a decent rogue like. As it stands now, it is overly unclear what is happening (why am I picking up different colored hearts?, what does a candle do?, etc) and it has some game breaking bugs. Example: After stage one my weapon dissapears and I get spammed with error messages. This is not a one time occurance. It happens every time.

I look forward to changing my review when some of the major issues get resolved.
